DETAILED ACTION

Prior Art

The examiner is mindful of the discussion of the Chinese journal reference in the document "RESPONSE TO FIRST WRITTEN OPINION". However, under US patent law for obviousness, the prior art does not render the claims as written obvious in the first place.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. The phrase "substantially free of impurities" is indefinite. There is no way of knowing what level of impurities that this entails.
2. The same is true of the phrase "of high purity".
3. Terms of degree, such as "substantial" or "relatively" are indefinite when the specification contains no "explicit guidelines" to distinguish from things which are not

so, *Ex parte Oetiker*, 23 USPQ2d 1651, 1655 (1990) and *Ex parte Oetiker*, 23 USPQ2d

4. The cephalosporin core is misdrawn in I and III as the bridgehead N is missing.
5. The last word in claim 1 is probably wrong. The term that applicants likely intend is “anti-solvent”. Likewise claim 18.
6. Claim 12 lacks antecedent basis. Claim 1 makes no specific mention of adjusting the pH.
7. The use of “like” in claim 16 renders the claims indefinite, since one does not know how similar it must be to be “like”.

Claim Objections

In claim 19, the comma should appear after the “xylene”, not before.

Specification

In every place in the specification and abstract, the cephalosporin core is misdrawn, as the bridgehead N is missing.
